Steinberg's Virtual Guitarist 2 is a professional, orchestral and virtual instrument featuring a.Q: Unable to obtain web server running on a VM on vagrant I am very new to vagrant and development in general, so bear with me. I have followed this guide (to set up a Vagrant Vagrant file to run a VM on my DigitalOcean droplet. I have followed every step in the guide to the letter, and it has successfully set up a VM and created a new user with their own home directory. I have installed git and node.js on the VM. I have also created a simple directory structure on my local machine. I have then tried to run vagrant ssh on the newly created user on the VM in order to see

the output. I have also tried it in the "demo" user created by default at the time the VM was setup. Neither command have returned anything, and when I type "vagrant ssh" into the terminal, I am immediately put into a root shell. The terminal outputs nothing, neither does my pastebin of the error message I receive when I try to run the vagrant ssh command. I have also ran apt-get update and apt-get upgrade. I have run all of the commands from the guide verbatim. My Vagrantfile:

```
Vagrant.configure("2") do |config|
  config.vm.box = "bento/sie/ubuntu1404"
  config.vm.network :private_network, ip:
    "10.10.12.13"
  config.vm.provision
    "chef_solo" do |che
